## County Announces Same Day Permitting and Appointment Scheduling Options

Same Day Permitting and Appointment Scheduling options are now available through the Plan Review and Permitting Department in the Washington County Division of Engineering & Construction Management (ECM).

“Offering expedient permit options lets businesses and residents know we are going the extra mile to help get projects done quickly and safely,” said Robert Slocum, Director of the Division of Engineering & Construction Management.

“These two programs have been tested over the past couple weeks and have proven to be very successful,” said Angela A. Smith, Chief of Permitting of the Plan Review and Permitting Department.

For the same day permitting option, customers are able to walk in and have their permit application processed, reviewed by Plan Review Staff and issued before they leave or by no later than the end of the same business day. This option is available to the customer at no additional cost.

The appointment scheduling option enables our customers to schedule an appointment, at their convenience, and have their application submitted without waiting. By eliminating the wait, our customers are able to complete their permit application quickly, saving time and allowing them to move on to completing their other necessary tasks throughout their day. This option is available as well at no additional cost.
