SUMMARY OF DUTIES

We are seeking applicants for four full-time Stormwater and Watershed Technician Internships for two internship cycles during the 2020 summer. Each cycle will involve two interns working together for 120 hours. The successful applicants will be involved in the production, collection, and application support of our geographic information system (GIS) database. Interns will work as a team in both an office and field environments using ESRI products and will be involved in the Clean County Initiative by supporting current watershed restoration and mapping efforts. Interns must be able to walk over uneven ground and stand for extended periods of time in summer weather. Applicants should have completed GIS 2 or an equivalent class and possess a valid driver's license.

Please have resumes to us by **April 17, 2020**. Interviews for employment will be held in Williamsport Maryland, and decisions will be made soon after.
