Explanation for Request: (Include the scope of work such as footers, foundation and/or underground utilities in your explanation for request)

As evidenced by written request, I have applied for a permit to perform footers/foundation/underground utilities prior to the review and issuance of the building permit. Because the building permit has not been issued, changes to the application may be required. By virtue of the footing and foundation permit, I fully realize and recognize that the foundation may change from that included in this application.

Neither Washington County nor any other agency with purview and approval authority will be held responsible for any labor, material, delay or other consideration, due to the footing and foundation permit. Vested rights are neither granted nor implied by virtue of the application or approval of the footing and foundation permit. All inspections must be called in and the work cannot be concealed until approval is granted.

The fee for the Footing and Foundation Authorization Request is \$75.00. Checks are to be made payable to the Washington County Treasurer.
