Digital Spatial Data Distribution Policy

The purpose is to establish procedures for the licensing and distribution of digital spatial data ("DSD") to the public by the GIS Office of the Department of Information Technologies on behalf of the Board of County Commissioners for Washington County, Maryland.

The policy of the County is to provide for effective control over the distribution of DSD. These types of data can only be accessed and viewed with computerized software specific to that purpose, the most common types of which are known as Geographic Information Systems ("GIS") and Computer Assisted Drafting systems ("CAD"). Other software may or may not be suitable for viewing these types of data, but the County makes no representations as to the effectiveness of any software. Data are distributed by non-exclusive license and not sale. The County retains exclusive title and ownership of all data. All rights not specifically granted in the license agreement are reserved to the County.

Notes:

- License agreement must be signed before any transfer of data
- Terms of license agreement must be followed
- Media may be digital download, CD, or DVD, depending on size of order
- Formats as listed, no custom conversions
- No automatic notice of updates
- Available products are subject to change without notice
- Allow 2 weeks for processing
