AOA Fence / Access Gate Realignment

ITEM NO. 2: Inquiry: Will you be needing temporary Fence to secure this ARFF Bldg Demolition AOA Fence/Access Gate Realignment project site? If so can you please provide the Total linear footage and project duration and I would be happy to prepa a quote.

Response: Per TSA Security requirements, all fences need to be secured to prevent unauthorized entry to the airport. The sequence we have been advised to follow by TSA has been to demo only those sections of fence that are going to be replaced during the day, and tie into the existing fence at the end of the day. Temporary fence height shall be the same as existing fence height (8 Ft.) Also, please note: Unsecured fence areas need to be always monitored by an airport badged person. The preferred method of doing the fence installation is to install the new fence first, and then demolish the old fence, either daily or at the end of the project. Total Linier Fence Length is in the project specifications.

ITEM NO. 3: Inquiry: We may not be able to attend the site visit. Is it a required visit? Also, will a list of attendees be made available?

Response: Part 1 of Item No. 3: Refer to the bid document, Page BD-16 Supplemental Terms and Conditions, Item No. 3 **Bidders Responsibility:** Each Bidder submitting a proposal for this work shall first examine the site, verify any dimensions pertinent to the work, and thoroughly be satisfied to the conditions under which he/she will operate or that shall in any manner affect any work under this Contract. The Bidder shall accept the site as he/she finds it. All proposals shall take into consideration all conditions that may affect the work. No allowance shall be made to any Bidder for negligence in this respect.

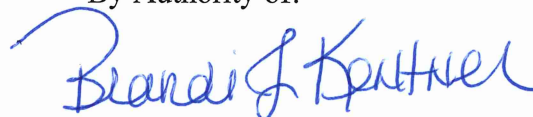

Response: Part 2 of Item No. 3: The Pre-Bid Sign-In sheet is included as Attachment A to this addendum
